Work Experience

Internship Project-1:

Organization : PetPals   May'18 - Jul'18
Project Name : UI Development
Description : PetPals is a start up company that is an aggregator in the Pet
Industry. They are operational in the market since a year and wanted to
enhance the user experience of the app. This project aims at creating a better
User Interface by redesigning some screens and creating new screens where
required so that the UI is improved.
Technical Description : Technologies used - Android, Java, Firebase API.

Internship Project-2:

Organization : PetPals   Jun'18 - Aug' 18
Project Name : Human and Pet Face Recognition
Description : PetPals is a start up company that is an aggregator in the Pet
Industry. They are operational in the market since a year. One of the major issues
they were facing was that some users were uploading random images where
they were expected to upload an image in the profile picture of themselves and
their pets. This was becoming a problem as these images were displayed on
their website and other social media platforms as well. Thus, this projects aim was
to recognise the presence of a human and/or a pet in the pictures uploaded.

Technical Description : Technologies used - Android, Java, Firebase API, Vision API.

Freelance Project:

Organization : S M Chemicals   Sep'18
Project Name : Website Development
Description : S M Chemicals is engaged in the manufacture of speciality water soluble Polymers for water purification and waste water purification for Sewerage water, effluent water and textile effluent colour removal polymers and dispersants for reverse osmosis water, boiler and cooling tower water treatment polymers.It is the largest textile effluent colour removal polymer and second largest in dispersants manufacturing in Telangana state. This project aims at creating a static website with some basic user functionalities.
Technical Description : HTML, CSS and Javascript
Website : https://www.smchemicals.co.in
